

THE GREAT MINIATURE RAILWAYS OF VICTORIA

**A GUIDE TO THE WONDERFUL WORLD
OF VICTORIA'S GREAT PASSENGER
CARRYING MINIATURE RAILWAYS.**

(As at 6th March, 2023.)

VICTORIA'S GREAT MINIATURE RAILWAYS.

The passenger carrying miniature railways of Victoria are the place to see railways in miniature, with steam, diesel, electric locomotives and colourful carriages providing a diverse and fascinating trip down memory lane of the Golden Years of Railways. Our passenger carrying miniature railways, which are located in many picturesque locations across Victoria, provide a unique & nostalgic insight into railways large and small as we once knew them.

There are many examples of miniature steam engines that ran up to 100 years ago that rub shoulders with scale miniatures of the very latest diesel electric and electric locomotives. Also, passengers may also ride in pristine examples of goods and passenger rolling stock that replicate in miniature railway equipment that was used up to 100 years ago.

The delightful passenger carrying miniature railways of Victoria are themselves up to 50 years old and have a unique charm and lively ambiance of their own. The railways listed are set in some of Victoria's most attractive parks and gardens and include a comprehensive railway atmosphere including bridges, stations, signal systems and tunnels, as well as many different types of scenic routes and operating challenges.

You will find a trip on them a rewarding journey down memory lane as well as being a novel railway experience in miniature.

The information provided for each railway, is necessarily brief but intending visitors are encouraged to contact the railway they intend to visit to check current timetabling and / or days of operation.

If any changes required to this operating and / or contact information, it would be appreciated if you could contact us at :
